Named by Modern Healthcare as the country's second most powerful physician executive in 2012 when she served as President and CEO of the American Board of Internal Medicine, Christine Cassel has also been CEO of the National Quality Forum, President of the American College of Physicians, and medical school dean at the Oregon Health and Science University. An expert in geriatrics, medical ethics, and quality of care, she was a member of the Institute of Medicine panel that produced the influential 1999 report, *To Err is Human*.
